

## **CW Test in ACP**

We did a test of consensus workshop in Adobe Acrobat ConnectPro.

There were challenges with VOIP. Next time we will try with Maestro Conference.

Participants appreciated Adobe's ability to approximate the feeling of a sticky wall made possible with movable and re-sizable note pods.

Participants can freely type their ideas, cut, copy and paste.

The focus question was around key considerations for ToP consensus workshop virtual tools.

It was easy to produce notes of the workshop using cut and paste, and a Grab tool (took less than 15 min).

We did not complete the workshop, but got pretty far.

Spent the first 30 min getting people signed on and oriented.

Spent the next 60 min doing the workshop.
