

A Whiteboard By Any Other Name

Posted by Daniel Mittleman on Wednesday, March 11, 2009 9:16 AM

Whiteboards are actually wikis. It is beyond me why they don't call them wikis and be done with it. To me, whiteboards are raster drawing tools, not text tools.

I agree. Whenever they say whiteboard I want to draw on it with colours.

Other Environments We Might Consider

Posted by Daniel Mittleman on Wednesday, March 11, 2009 9:34 AM

These are other tools this work team could consider rather than Huddle

www.ning.com - this is an enterprise social networking environment - free

www.hivelive.com - this is yet another enterprise social networking environment - free, I think

www.elgg.com - same thing; this one is open source

www.officezilla.com - this is a team portal. It is open source and stable. Lots of features but, alas, no wikis.
